PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience in the MERN stack (MongoDB, Express.js, React.js, Node.js), complemented by Tailwind CSS, API integration, and payment gateway implementation. Currently pursuing a B.Tech in Computer Science Engineering with a strong academic record (CGPA: 7.86). Experienced in building end-to-end web applications including coding platforms, doctor appointment systems, and AI-powered image processing tools. Passionate about building scalable, secure, user-centric applications.

TECHNICAL SKILLS

Frontend: React.js, JavaScript, Tailwind CSS, DaisyUI, HTML5, CSS3, Vite, React Router

Backend: Node.js, Express.js, REST APIs, WebSockets, Axios

Database: MongoDB, Mongoose ODM

Auth & Security: JWT (JSON Web Tokens), Authentication & Authorization, Role-Based Access Control

AI/ML & Cloud: Google Gemini AI, AI Background Removal APIs, Cloudinary (Media Management)

Payment & DevOps: Razorpay, Webhooks, Git, GitHub, Postman, VS Code, Docker (Basic), CI/CD Knowledge

Other Tools: Monaco Editor (In-browser Code Editing)

KEY PROJECTS

Code Namaste – Coding Platform

- Built an integrated coding platform inspired by LeetCode, enabling users to solve programming challenges and track progress.
- Integrated Monaco Editor for a seamless, VS Code-like code editing experience directly in the browser.
- Developed an intelligent chatbot using Google Gemini AI to provide real-time, coding-specific assistance and explanations, enhancing user engagement.

Technologies: React.js, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Monaco Editor, Google Gemini AI, Axios, JWT, REST APIs, Git/GitHub, Vite

Prescripto – Doctor Appointment System

- Architected a RESTful API-driven platform to streamline appointment booking, cancellation, and doctor scheduling.
- Implemented secure user authentication and role-based access control (RBAC) using JWT for patients and doctors.
- Integrated Cloudinary for secure profile image storage and designed a responsive UI using Tailwind CSS, DaisyUI, and React Router.

Technologies: React.js, JavaScript, Tailwind CSS, DaisyUI, Node.js, Express.js, MongoDB, Mongoose, JWT, Axios, REST APIs, Cloudinary, React Router, Git/GitHub

AI Background Remover

- Developed an image processing web application allowing users to upload images and instantly remove backgrounds using third-party AI APIs.
- Implemented a secure payment workflow using Razorpay and Webhooks to process transactions and unlock premium features.
- Managed image uploads and processed results efficiently using Cloudinary for cloud storage and performance optimization.

Technologies: React.js, JavaScript, Tailwind CSS, Node.js, Express.js, MongoDB, Mongoose, Cloudinary, AI Background Removal API, Razorpay, Webhooks, JWT, Axios, REST APIs, Git/GitHub, Vite

EDUCATION

B.Tech in Computer Science Engineering

Quantum University, Roorkee, Uttarakhand

CGPA: 7.86 | Graduation Year: 2027

CERTIFICATIONS & ADDITIONAL INFORMATION

MERN Stack Course Certification — Internshala

MERN stack training with hands-on projects.

Languages: English, Hindi | Availability: Immediate
